

Questions and Answers regarding City of Kirkland RFP for Wireless Services to Everest Park and Houghton Beach Park, Job Number 48-14-IT:

Q: Router Configuration - As far as router configuration, are we proposing/creating and handing over, or following a determined configuration? If already known, do we have access to any details of that configuration?

A: Successful vendor will be responsible only for procuring the equipment. City Staff will handle all configuration of the equipment and work with the vendor on achieving successful connectivity.

Q: Beyond installation, configuration, and testing is there a maintenance component to this project?

A: After acceptance, there is no additional maintenance requirement for this project. The City of Kirkland will manage and maintain the accepted system.

Q: Who is responsible for the electrical connections for the Access Points?

A: Vendor will be responsible for all electrical work and should include this information in their response.

- Exception: The mast arm at the corner NE 59th Street and Lake Washington Blvd will be handled by the City of Kirkland Public Works Department.

Q: Are there any special requirements for make ready work?

A: Yes, Puget Sound Energy in most cases will require a deposit fee for make ready and engineering. Vendor will be responsible for this and should include this information in their response.

Q: Are there any special requirements for over lashing?

A: Yes, Puget Sound Energy requires that they at least be notified of any new over lash activity. Lake Washington School District is the owner of the existing innerduct/cable along 108th Ave NE/6th St S and will need to be notified as well. Vendor will be responsible for this and should include this information in their response.
